worksystems 120 series

The 120 series is a smart, elegant system with versatile shapes and minimalist aesthetics. The 120 series creates new opportunities for interiors, with refined detailing in the way components meet giving it a slender profile and large sweeping curves.

120 series works just as smart as its appearance. It can be anything from a basic, stand alone table to groups of high density workstation clusters.

Cable management is via a segregated cable basket mounted to the underside of the worktops or via our built in cable duct built into the screen panels, with the options of hard wired or softwired cabling.

worksystems 120 series

Our standard worktops can be specified 25mm or 33mm thick with square or soft rounded corners (50mm radius). Available finishes include selected laminates, timber veneers and coated MDF in a range of standard colours. Custom edge profiles and finishes are also available upon request. Offering vast design possibilities.
